

Environmental Policy

Diphex Solutions Limited aim to be the leader in our industry for providing sustainable and environmentally sound products, operations and services in order that we continue to trade responsibly. We will achieve this by:

- Continually developing, maintaining and implementing our policies and procedures to assess and monitor the environmental impact of our operations
- Ensuring compliance with applicable environmental laws and regulations
- Communicating regularly with our stakeholders, including employees, customers and suppliers, on matters of environmental policy and procedure
- Continuously improving by reviewing and setting appropriate targets
- Supporting and empowering our employees to meet the policy and procedural requirements

More specifically we will:

- Minimise our use of raw materials, energy and water and emphasise actions that will reduce our fossil carbon footprint
- Apply the principles of reduction, reuse and recycling to our operations, products and services where practical
- Commit to manage products and services that meet our customer needs and have a sound environmental profile
- Partner with relevant trade bodies, government agencies and customers to help inform and educate interested parties on the environmental impacts and benefits of our products

Further information on how we can all contribute to reducing waste in our day to day activities can be obtained from your Manager, the General Manager or a Director of the Company and should be discussed on a regular basis.
